

Token Exchange by TrustedRouter

The Global Exchange for Trusted Tokens

Secure · Smart · Scalable · Savings

Token Exchange

THE EXCHANGE FOR TRUSTED TOKENS

● **VERIFIED SUPPLY**
Attested. Compliant. Secure.

● **GLOBAL LIQUIDITY**
Best price. Real-time routing.

● **ENTERPRISE GRADE**
Trust. Performance. Scale.

● **TRUSTED TOKENS**
Verified. Standardized. Trusted.

● **INTELLIGENT ROUTING**
Right model. Right provider.

● **PRIVATE BY DESIGN**
Confidential routes. Data control.

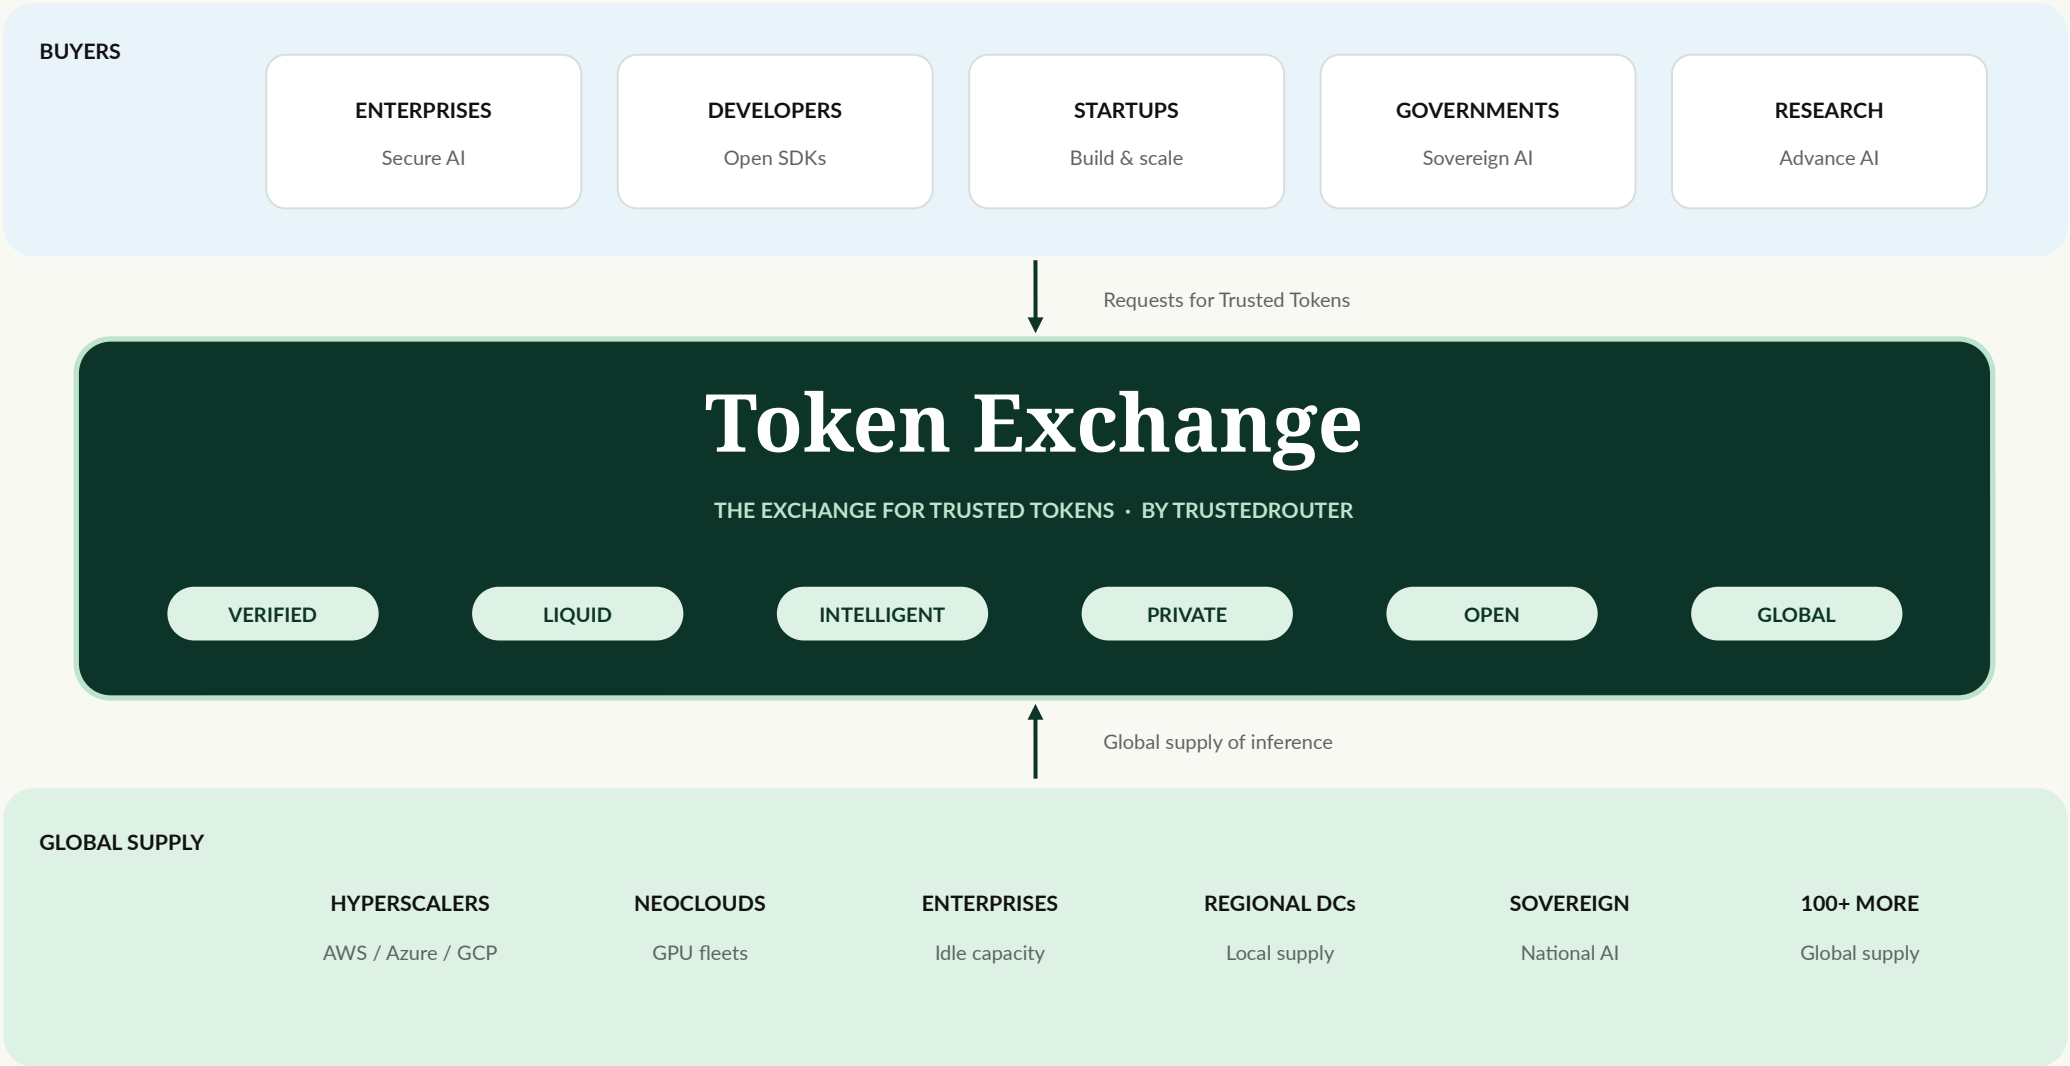

ONE EXCHANGE. A MORE OPEN AI ECONOMY.

GLOBAL AI ACCESS. ENTERPRISE CONTROL.

Buy the world's AI on your terms. Sell your capacity to the world.

One connection to the market.

Buy AI on your terms. Sell trusted supply into global demand.

Built by experience. Backed by conviction.

Founder depth, respected technology investors and real operating momentum.

Joseph Perla

Founder & CEO

Princeton • Facebook • Lyft

Built and sold a GPU cloud (Terminal.com, acquired by Udacity), led News Feed on iOS at Facebook and built autonomy systems at Lyft. Now building the trust and exchange layer for the multi-model AI economy.

THE THESIS

As AI becomes multi-model, the routing layer becomes critical infrastructure.

TrustedRouter makes that layer open, intelligent and verifiable.

EARLY MOMENTUM

\$6M

Seed financing

600+

AI models

81+

Providers at funding announcement

1B+

Tokens routed in one day

Financing as of Sept. 2026 • other metrics Axios-reported, Aug. 2026

Bill Tai

ACTAI • TrustedRouter investor

Early investor: Zoom & Canva

“This market has unfolded FAST. TrustedRouter’s open source roots and rapidly growing following put the company into an amazing ‘vortex of information’ that is allowing rapid product evolution to meet customer and market needs.”

INVESTOR PERSPECTIVE

Buy. Sell. Run it yourself.

Three positions in the exchange. Use one or all three.

BUY

Access global AI intelligence.

Hundreds of models and competing providers through one interface, with your controls for privacy, provenance and jurisdiction.

GLOBAL ACCESS

SELL

Turn idle capacity into revenue.

Buy the peaks, sell the quiet hours. List spare GPU capacity or your own models, served by our open provider stack.

NEW REVENUE

RUN IT

Keep your gateway. Add one connection.

Run the free enterprise-grade open-source gateway, or keep the one you have. Direct routes to your current providers stay live.

NO LOCK-IN

YOUR ENTERPRISE TODAY

Queued behind two or three approved vendors

WITH THE TOKEN EXCHANGE

A participant on both sides of the global AI economy

THE FLYWHEEL

More supply → more demand → better prices

Pricing power before the first token.

A credible alternative changes your next negotiation. Moving eligible workloads changes the bill.

YOUR NEXT PRICING CONVERSATION

“We can place eligible workloads through a global exchange. What is your best price?”

Compare the same model, privacy and service terms.

\$0

of exchange spend can still create negotiating leverage: an approved alternative is ready to use.

Illustrative scenario.

ILLUSTRATIVE: A \$40M ANNUAL HYPERSCALER TOKEN BUDGET

WORKLOAD	TODAY	WITH THE EXCHANGE
Strategic tokens 60% of traffic, retained on your hyperscaler	\$24M	\$24M
Regular tokens 40% of traffic, moved to qualified open models	\$16M	\$3.38M
Total annual token spend	\$40M	\$27.38M

\$12.62M

MODELED ANNUAL SAVINGS

31.6%

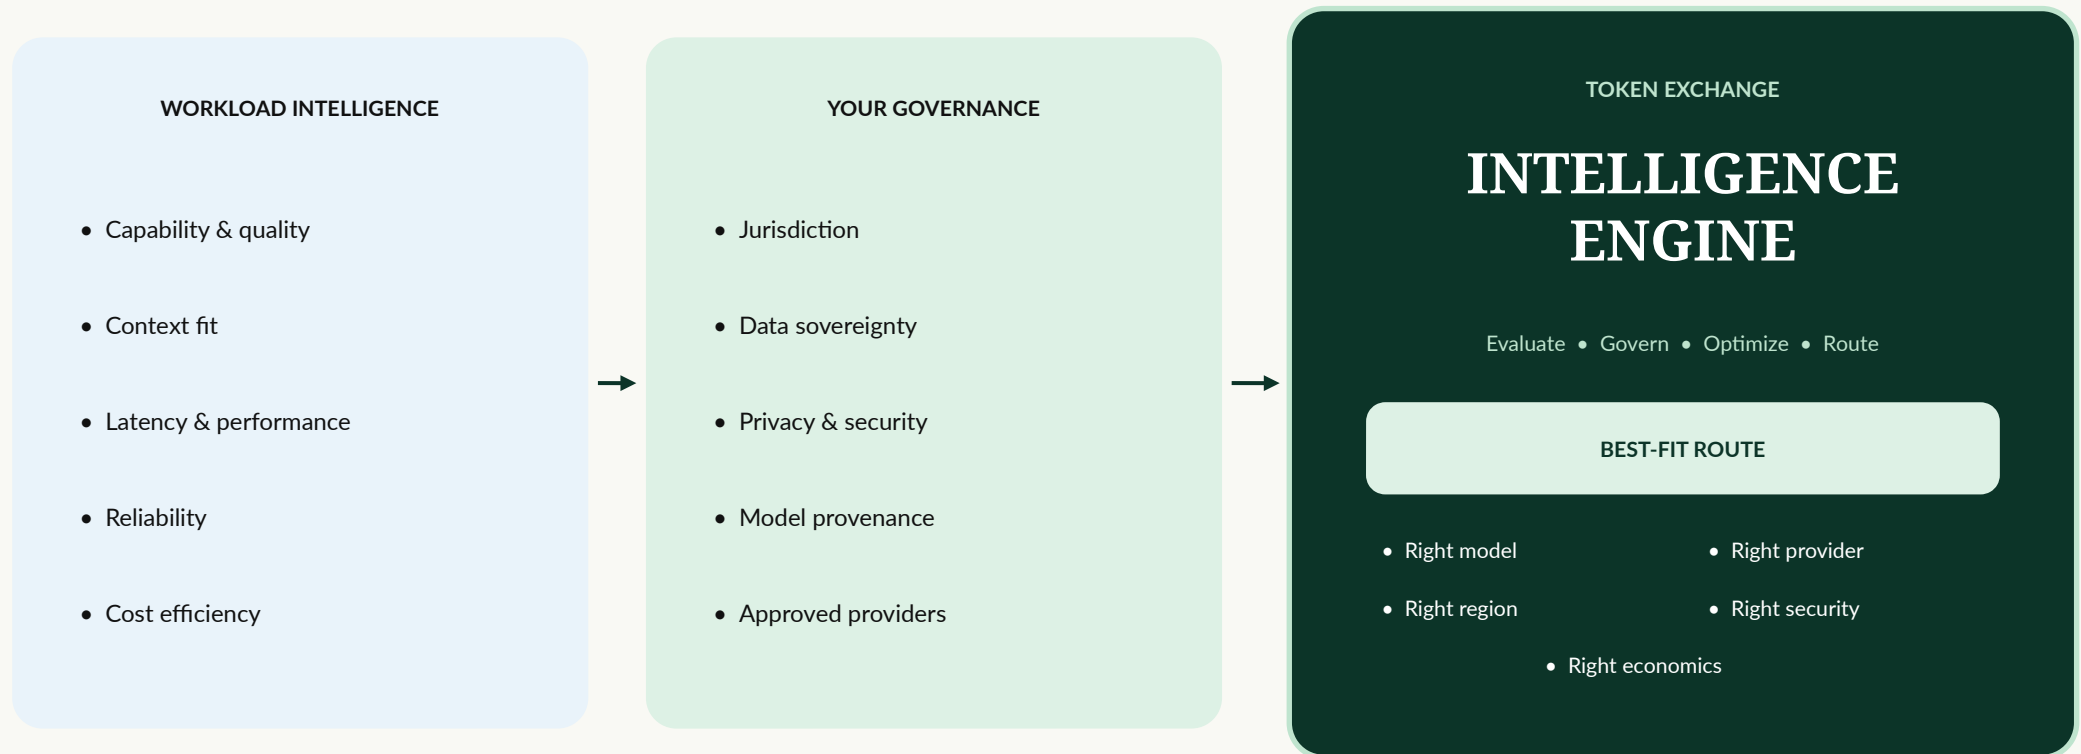

LESS TOTAL TOKEN SPEND

Regular tokens: \$3.2M provider cost + \$176K TrustedRouter fee (5.5% of routed provider cost) = \$3.376M a year.

Assumes 40% of traffic equals 40% of spend, 80% lower provider unit cost and unchanged volume. Quality and security must pass your evaluation; migration costs excluded.

Intelligent routing, not just cheaper routing.

The Token Exchange selects the best-fit route for each workload, inside the security, sovereignty and governance boundaries you define.

WHY THIS MATTERS

COST-ONLY ROUTING

Lowest price → model selected → governance discovered afterwards

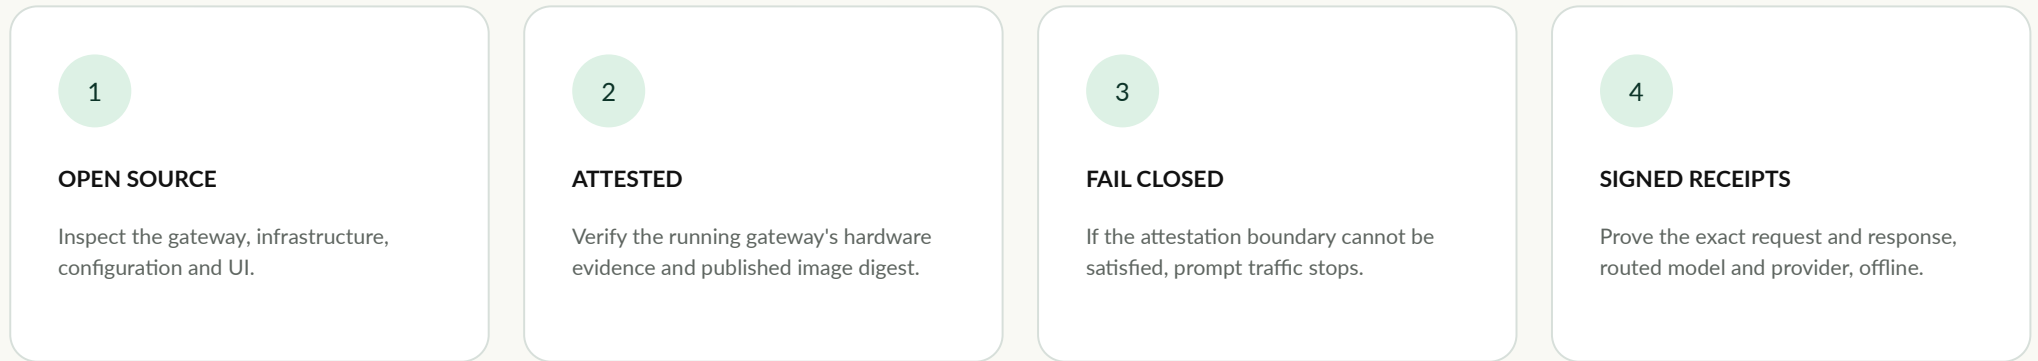

TOKEN EXCHANGE

Workload + policy + trust + economics → best-fit governed route

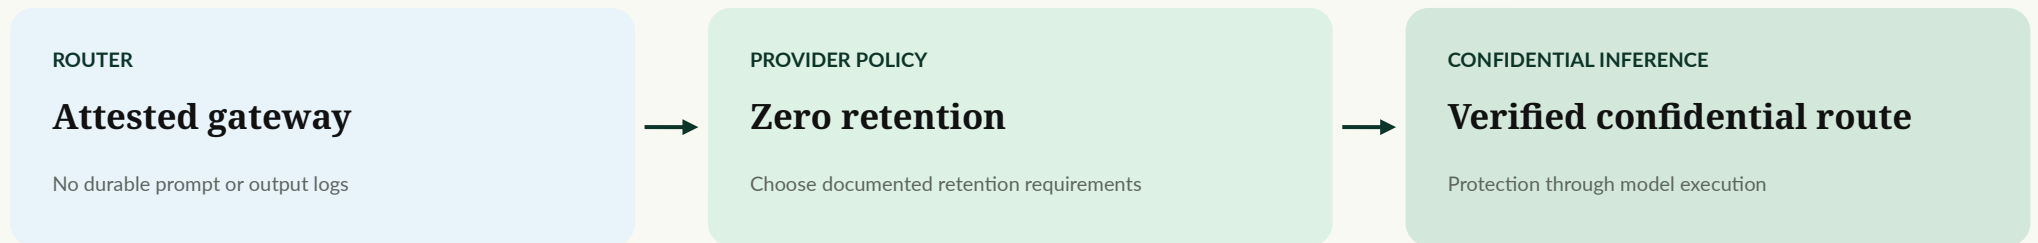

The cheapest capable model is not always the right model.

Private by design. Verifiable by default.

Trust should be evidence, not a contractual promise.

PRIVACY WITH PROOF • CHOSEN PER REQUEST

ENTERPRISE READINESS

Open source | Attested | Fails closed | DPA and BAA available | SOC 2 Type II observation in progress

Proof, not promises.

Check every claim in this brochure yourself, then start with one workload.

IN PRODUCTION

170,974

litigation documents processed

Robot, Robot & Human

A litigation firm running a production legal AI workflow on TrustedRouter, live three weeks after first contact.
